

2.5.3: Information on examination reforms

It is observed that the process and procedure of conduct of evaluation/examinations has evolved with great deal of dynamism. The University examinations are aimed at making the system foolproof. The question papers are downloaded in the specified place, usually the examination hall in front of the university observer, secured by the password which is sent exclusively to the C.S/D.S. The process of manual evaluation has been totally replaced by digital evaluation and the marks are uploaded immediately and frozen. Two evaluators' marks are uploaded. The deviation evaluation is automatically decided to if the marks allotted have gross difference. Similarly the practical/clinical marks are also uploaded and frozen on the day of exams. This allows the early declaration of results. The CIA exams also have evolved with lot of improvement and reforms. OSCE/OSPE are used by all the depts. of the institution to avoid any grievances and bias for the students.
